Additionally, the company has signed an agreement to acquire a recently handed-over Grade A office building in Dubai Internet City, '6 Falak'.
- **Logistics** Adj. EBITDA in Q2 2024 was AED 15 million, a 24% YoY increase and for the six-month period was AED 30 million, up 21% YoY, with occupancy of 94%. The platform continues to pursue growth and expansion through an AED 1 billion investment programme – which included the acquisition of '7 Central' – to expand Aldar's total logistics GLA in the UAE to more than 400,000 sqm. In July, Aldar signed a strategic agreement with DP World to develop a first of its kind mega 144,000 sqm Grade A logistics park within National Industries Park in Dubai. This investment is in line with Aldar's develop-to-hold operating model, providing it with key access to a strategically located and well-connected logistics hub.
- **Hospitality** Adj. EBITDA in Q2 2024 increased 8% YoY to AED 71 million and decreased 2% YoY in H1 2024 to AED 178 million, due to one-off income recognised in the same period last year. On a like-for-like basis (excluding one-off recognised in H1 2023) Adj. EBITDA increased by 8% YoY. Occupancy rates reached 73%, while average daily rates (ADR) increased 4% YoY, and revenue per available room (RevPAR) rose 10% YoY. This was further bolstered by positive contributions from acquisitions over the past two years, particularly in Ras Al Khaimah, which continues to surpass expectations.
- **Aldar Education** Adj. EBITDA in Q2 2024 increased 19% YoY to AED 61 million and in H1 2024 was AED 116 million, registering a 25% YoY growth. The robust performance was driven by solid operational performance with H1 2024 enrolments up 27% YoY for Aldar-owned and operated schools, and up 3% YoY for Aldar-managed schools. The total student body now exceeds

36,500 across 30 schools made up of 11 owned-and-operated schools and 19 managed schools across Abu Dhabi, Dubai and Northern Emirates. The business is set for further expansion with two new greenfield schools opening at the start of the 2024-2025 academic year and an additional school in the following year.

- **Aldar Estates** Adj. EBITDA in Q2 2024 surged 175% YoY to AED 84 million and increased 160% YoY in H1 2024 to AED 155 million. The strong performance is owed primarily to the strategic decision to significantly scale this platform through a series of strategic mergers and acquisitions completed last year, creating the region's leading integrated property and facilities management platform, with synergies driving substantial efficiency and value. The enlarged platform now manages 158,000 units across 2 million sqm gross leasable area and holds contracts valued at AED 1.9 billion.
- Aldar is executing its comprehensive investment and partnership programme to deliver diversification, scale, and earnings growth. This includes a develop-to-hold pipeline that has expanded to AED 7.6 billion across retail, commercial, logistics and hospitality assets, as well as a AED 1.35 billion investment in Aldar Education. These programmes are additive to Aldar's ongoing acquisition strategy and are expected to significantly boost recurring income streams and long-term capital appreciation.

## Corporate Debt Updates

- In May, Aldar Investment Properties issued its second USD 500 million 10-year green sukuk and tendered to buy back the sukuk maturing in 2025. The issue achieved the tightest credit spread ever priced by Aldar and was four times oversubscribed by regional and international investors. The tender to buy-back the 2025 sukuk enabled Aldar to use part of the proceeds to refinance existing debt and extend its debt maturity profile.
- In Q2 2024, Aldar refinanced LSQ's existing debt with a new unsecured loan effectively upsizing the loan, achieving better rates and more favourable conditions. This strategic initiative enhances LSQ capital structure to support long-term growth objectives and aligns with Aldar debt policy.
- Year to date, Aldar has secured AED 3 billion in senior unsecured financing. These five-year bullet revolving credit facilities have improved Aldar's liquidity profile and extended the average maturity of its debt to 5.4 years.
